Dorintosh Community Co-op  
Saskatchewan, Canada

We were so excited to have "WearMax®" installed in October 2009 on our gymnasium floor as well as on our VCT floor in the outer halls, kitchen and bathrooms of our community hall/gymnasium. This facility supports all of the town's fundraisers like weekly bingo, dances, festivals, all kinds of sporting events and doubles as the school's gymnasium. We cannot regulate the type of footwear on the floors, so all kinds of things are tracked in during all kinds of weather conditions, and we have lots of tables and chairs being moved across the floor's surface and yet the finish on the floor has not been affected. We just love our "WearMax®" surface. It's wearing really well.

"WearMax®" has been so low maintenance. It has reduced our janitors work load and we don't pay for stripping and waxing or all the supplies. It's holding up great! It looks like it did after the first month of use and the floor finish hasn't declined since.

Plus, the students and faculty love that it's very grippy and delivers traction for our students and players so it's been great for all the different sports like badminton, basketball, volleyball and floor hockey. The shoe and hockey stick marks come off really easy. Our janitor used to really complain about cleaning those but now nothing sticks to the surface.

We are very happy with the "WearMax®" ceramic coating and would highly recommend it to all schools for both their wood gymnasium floors and their hallways and classrooms.

Sincerely,

Pam Dallyn
